## *Introducing COLOUR: Strangers EP*

*Recorded at Liverpool's legendary Parr Street Studio's the Stranger EP is the debut release from electronic art rockers COLOUR. Fusing together influences from Classical, Rock, RnB, Electronica and Indie, COLOUR have created a debut masterpiece. In the spring of 2014 the band were proudly awarded the Merseyside Arts Council; Future Music award, which recognises outstanding talent and provides a package of financial support and industry guidance to emerging talent. In the summer of 2014 the band teamed up with up and coming producer/ engineer Tom Longworth (enter bands that tom has worked with) and began to lay down the outstanding debut EP. Having gained a furious creative drive, the band created three brand new tracks to feature on the EP: Mediterranean, Strangers and Shattered, accompanied by the classic debut 'Red'. Heavily championed by BBC Introducing's Rob Adcock, the band is due to unleash the EP during the beginning of 2015, a year that promises to see the band continue to rise and build on their thunderous debut.*

*It is with great pleasure that we present to you a selection of tracks from the Strangers EP, and an exclusive preview of material to feature on the follow-up to the debut EP:*
