

FRANK KLASSEN

At 5 years old Frank Klassen had no idea his journey into classical music would lead him to working in the studio, hand and hand, with Deep- & Tech House legends like Tube & Berger or Blues-Rock legend Mungo Jerry (In the Summertime). At a very early age he began studying cello, voice and guitar which gave him the structure to create his path into electronic music.

Frank released his debut EP „I was Lost“ on Tube & Berger's Label ZEHN Records. Additionally they teamed up for an exclusive NFT project on which they released "Feel The Same" together on RcrdShp. But that is just the beginning. The next Tube & Berger, Frank Klassen collaboration is already on the way.
