

## Snakedoctors - Four and a half (2022)

### About the album:

„Four and a half” is the fourth Snakedoctors album in just two years - since May of 2020 when it all started in a small studio in Gdansk, PL. It’s a double album which works a bit like a two sided album - just like with cassettes and vinyl. The red album stands for Side A and continues recent band’s fascination with new wave, dark wave and post-punk. There is more electronic music in it again.

Apart from producers known from previous albums - Chris Bolster from Abbey Road Studios and Andy „Happy” Baldwin from Metropolis Studios in London, the band managed to get to work with them Joe Gibb and Kevin Paul, who had worked previously with Depeche Mode, the Cure, Yazoo, the Kinks, the Mission and David Bowie. And you can tell it right away. Especially in „Crime Story”, „Friday Night”, „Wonder Girl” and „Love”. One of the songs was mixed and mastered by Matt Gerhard co-operating closely with Spoon. And in another one - Corey Alley, one of vocalist/guitarist’s US friends from his college times when they both played in bands. First singles off that album already charted in Poland (Radio Olsztyn and Radio Ostrowiec charts) and in other countries (the UK and Central America). Even though they are an indie band those songs got an airplay worldwide (four continents).

On the red album there are 11 new songs plus two alternative versions and two completely different remixes done by talented artist from Canada - Grace Chiang. There’s also a new wave remix of one of side B grunge songs done by band’s guitarist.

The Black album - so called “Side B” - contains songs definitely on the grunge side. Starting with „Too Many” and „Fade Away” thru „Inside”, „Mean and Ugly” and „Wuss”. All those songs were mixed and mastered by Dawid Gorgolewski at Osso Studio in Gdansk, PL.

Snakedoctors already recorded most of songs for... the fifth album.

### About Snakedoctors:

Snakedoctors are four friends who started the band in Gdansk, Poland in May of 2020. Since then they released eighteen singles (including a Christmas special and a song in Czech under name Jiri Blaha & Framuga Boys) and three albums: „Obligation”, „Joy Free Bowl” and „Mellow Joy”. Their biggest hit single so far - „Close That Door” has been a number one for over 30 weeks in Poland at Radio Olsztyn Top 40 and also at Radio Ostrowiec Top 20. “Crime Story” reached number two at Radio Ostrowiec Top 20. Another one - „Got Him Another Girl” reached number one at radio airplay chart for Central America. All singles charted at Poland iTunes Rock Top 100 (many of them reached

number one), one of the indie radio charts in the UK (including three number ones - „A Song”, „Tinder Girl” and “Crime Story”) and other radio charts in the US, Columbia, Ecuador and Peru.

Snakedoctors songs get the airplay in many countries worldwide and on 4 continents. The same applies to reviews that their albums and singles get.

Their upcoming fourth double album „Four and a half” is out in May. The album is officially supported by two radio stations in Poland - Radio Olsztyn and Radio Tczew. The songs on both cds will be very diverse. On the first one there are songs influenced heavily by new wave, dark wave, post-punk and shoegaze. And the second one is definitely on the grunge side. As before the band managed to get to co-operate with many well known producers. That includes not only the regulars from Abbey Road Studios (Chris Bolster) and Metropolis Studios (Andy “Hippy” Baldwin”) but also - Joe Gibb who is well known for his work with Depeche Mode, The Cure, The Kinks, Jane’s Addiction, Stone Roses and The Mission and Kevin Paul who worked with Depeche Mode and the Kinks and also with Yazoo, Erasure and David Bowie. Another producer involved in making one of the songs is Matt Gerhard working closely among many with the band Spoon. Also the vocalist and guitarist’s friend - Corey Alley (Hobbit Hole Records) will appear on the album. We will also have a few female vocalists appear in songs. There are also three remixes of album songs - two of them were made in Vancouver, Canada and another one was done by Wojciech the band member, the one who used to play in bands in the US during his college years.

As they say - they play music because it’s fun. It’s an indie band releasing their music on indie label Case Studio. Band’s albums are distributed by MyMusic.
