

I am a solo artist with a guitar and a VoiceLive Touch2. I will have 2 jacks, 2 XLRs and a power cable. I will need a mic stand.

My sound all goes through the VoiceLive Touch so I just need to connect one XLR to the sound desk and I'm good to go!

I will need somewhere to plug in the VoiceLive Touch, possibly with an extension lead as it's quite a short cable.

Thanks! :)
