

*"Chikiss's music is dream pop turned inside out."* ©The Wire Magazine

*"The main property of Chikiss is the ability to master, animate and humanise practically any soundscapes. Frank romanticism, which is a big value in these cynical times; as well as a melodic talent, as if it comes from the cosmic past."* ©Afisha Magazine

*The synth music of producer Galina Ozeran sounds like it travelled far across time and space to reach your ears.* ©Daily Bandcamp

For singer and composer Galina Ozeran, better known as Galya Chikiss, music is an endless art process. She was born in Belarus, in her early youth she moved to St. Petersburg, and from there she moved to Berlin. Her musical tastes are also in constant motion: from the field of post-punk and psychedelic rock, she moved to the territory of synthesiser pop music and ascetic electronics, not forgetting her old love for Soviet and Japan avant pop and existential lyrics. Today, it is appropriate to talk about Galya Chikiss in the vein of performance legend Laurie Anderson, analog new age pioneer Suzanne Ciani, pop futurist Kate Bush and other women who made important discoveries in electronic music. Chikiss performs all the vocal, synth and electronic parts alone in real time, programming the effects and reworking the beats, synthesising unpredictable patterns from acoustic pianos or electric organs. Her unique samples and DIY approach to music production set Chikiss apart from most of the electronic pop scene. Galina has 5 full-length albums (two of them were released by the reputable American label Not Not Fun) and numerous singles, EPs, mixtapes, concerts in alternative music centres and festivals. Also numerous projects with musicians from different countries such as Thomas Azier, Ensemble Economique, Eva Geist, Die Wilde Jagd, Barbara Morgenstern, Bad Hammer, Pilocka Krach, Etkin Cekin, Sveta Ben, Maya Postepski and many others. With Turkish musician and producer Etkin Cekin they perform and release music as a duo God is God.
