

SPT RIDER

I perform with a Yamaha PA 130 keyboard. It requires a mono-out, 1/4" cable.

I also perform with a MPD MIDI controller. It connects to my laptop which I will also have with me. With this, I simply need to connect computer to the mixer with an 1/8" cable.

I also bring a "microbrute" keyboard. I will connect this to my laptop as well. There's a chance I might use the audio out. If I do, that would be another 1/4" output

On top of that there is my voice. I require a microphone and microphone stand
