

## Will Haze – Technical Rider

Really simple just 2 stereo/mono inputs into the main PA / Sound system, as the outs on the DJ controller are just 2 Phono Jacks to 2 ¼ Inch Jacks.

All other equipment will be provided by the artist for example, MacBook, DJ Controller, Sennheiser HD25's, can bring personal 12-channel mixer if any help for sound engineers/technicians?

Will require monitor feed back e.g. wedges from the main output to mix to.

Lighting can be open to the lighting engineer at the time.
