Nicola uses his PEDAL BOARD with AMPLI Emulator (Neural DSP - Quad Cortex)

Francesco Tripaldi: BASSIST

1 X Bass Amplifier Head + Cabinet 4x10 or 1x15 if available

Francesco uses his PEDAL BOARD EFFECTS

TECHNICAL RIDER VERSION WITH IN-EAR MONITORING SYSTEM

The band use a personal MIX and IN ear Monitoring System that consists of a digital mixer (**SOUNDCRAFT UI 24R**) with separate AUX for the band members via personal radio In-Ear and for the drummer via cable (2 per XLR)

Main OUT XLR Left & Right from the **SOUNDCRAFT UI 24R** goes directly to FOH Mixer, and the mixing controls for levels/EQ/Effects are controlled by an Ipad/computer via WI-FI/Ethernet. No app is needed, just a browser.

In this version, all signals/microphones go into the SOUNDCRAFT, also drum mics.

LIGHT SYSTEM DMX

The band is also equipped with a light system controlled via DMX from the same computer used for the playbacks. In this way the light show is totally in Synch with the music. The system is also equipped with two fog machines.

4 x Stairville MH 110 WASH LED Moving head

2 x Stairville Stage 3 Led

2 x Stairville LED Bar 240/8 RGB DMX 30

2 x Stairville Af 250 Fog Machine
