

TECHRIDER

2023v01

Please hand this out immediatly to the responsible technicians.

(0) General

The stage plot and the technical requirements are a fixed part of the agreement between the band and the promoter and are necessary for a smooth realisation of the event. We know, of course, that it's not always possible to realise everything mentioned here. If there are any complications please contact us and we'll sort it out. We are friendly guys and open for suggestions.

Booking:

- Julian Janisch - julian@kkt.berlin

Pre- Production / TM:

- Adrian Krummel - adrian@teamgood.de - +49 (0) 15770881756

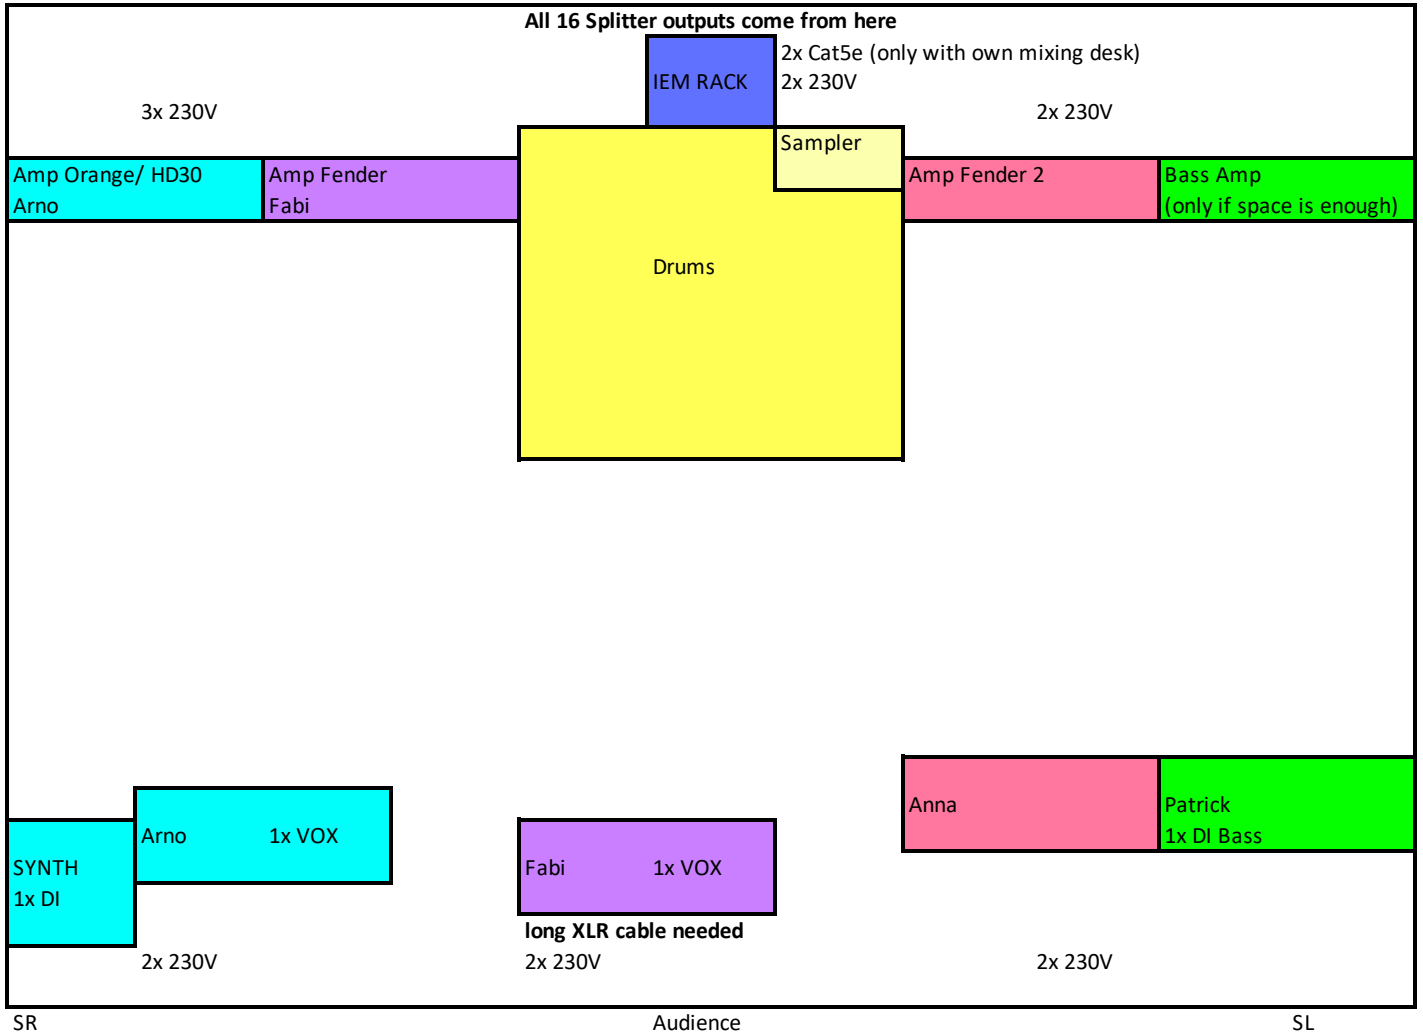

We need:

- For Drens (4) + Crew (1 -4) a safe parking spot in direct setting to the venue for **1 Sprinter**
- After arrival we ask for two house technicians (sound&light) who are constantly present till end of show
- Strong and well sounding PA (no selfmade DIY stuff) with enough headroom. Please be aware that Drens can be a loud band.
- Access to all power amplifiers and limiters
- Please provide two (2) Cat - 5 connections from FOH to stage, if we are travelling with our own mixing desk (see Nr. 1)
- 1h before change over/ soundcheck: space to prepare backline close to stage
- If it is a support show and not communicated otherwise, the band will not bring it's own mixing desk or personal for. We are happy for committed and friendly local sound staff.

- **(1) Mixing desk:**
 - We'll bring our own mixing desk (Midas Pro1) for sound. Please provide two (2) CAT - 5 connection from FOH to stage
 - Please provide a stable table minimum 1x1x0,8m
 - **ONLY ON HEADLINE SHOWS OR IF COMMUNICATED OTHERWISE**
- **(2) Cables and mic stands:**
 - We require the whole cabling for the stage as well as power supplies as mentioned in the stage plot, at least ca. 10 XLR - Cables (3-10m length)
 - 2 big and 1 small mic stand (see stage plot and input list on page 3)
- **(3) Monitoring:**
 - We'll bring our own monitoring rack. **No wedges on stage please**
- **(4) Mics:**
 - We'll bring all mics on our own. Please provide a few backup mics.
- **(5) Lights:**
 - We travel without a light technician and we'll be happy about an ambitioned light technician at the venue/festival who's operating the show. We will bring a setlist with cues and wishes.
- **(6) Riser:**
 - We are very happy about a drum riser. If not possible in a support situation we can put our drums in front of the Main backline - no Problem!

DRENS

Note:

There are two versions of the input patch. The shorter version is only the channels going through our splitter. It's everything you need to mix a show and perfect for a support show. The longer version has more additional Mics and is used if we travel with our own mixing console and engineer.

Input Patch small (no console)
