Structure of the band:

What we need from the organizer::

- 3 x monitor boxes, i.e. one box per band member
- 3 x MIC (Sure SM58 or equivalent)
- 3 x MIC stands with boom
- All necessary cables for MICs, monitor boxes and FOH mix as well as 8 sufficient power connections

Technique:

All audio channels (including MIC) are connected to our audio interface and mixed in advance.

During the sound check, it must be possible to correct the mix if necessary. **The stereo sum is sent to the organizer's FOH mix. The three monitors are connected to our audio interface via an AUX connection.**

Remark:

We will bring our own keyboard and laptop stands - the organizer will ensure that there is enough space on the stage. Please also ensure that there is sufficient lighting. **The organizer will inform the band up to 10 days before the performance of the person responsible.**
