BOOKING MUSIC PORTFOLIO **BIO**

SAILO is a project conceived by Manuel Bruno, a 26-year-old Argentine from the city of Zárate. His connection with music began at the age of 13, experimenting with mixing DVD players and records that he found in the family collection. It was the found of the DJ and producer Skrillex that introduced him to the world of electronic music, awakening his passion for the most important festivals of the genre.

During his early years he dedicated himself to music until the age of 20, when he decided to move away. However, five years later he rediscovered his passion for music, immersing himself in another genre within the musical spectrum: techno.

Under the name SAILO he reactivated his artistic career. This alias tells the story of a planet called Lingua, whose inhabitants create a being with the purpose of sending it to Earth to transmit their language.

This fascinating story unfolds in chapters; each is presented via an EP, turning the narrative into a captivating listening experience.
