

### Technical Rider

Being an MC all I need is one mic and a PA system. As long as the mic is of a good vocal quality where my lyrics can be heard clearly that is fine. I have liked using the Shure SM58 in the past.

If I am allowed my own paid DJ, my DJ needs the Technics 1210. The rest of his equipment he brings himself. If I am not permitted my own DJ a CD PA system will suffice.
