

Lock Up Laura - Technical Rider

Number of people in the band, what each person plays and number of those who sing.

Lock Up Laura is a five piece rock band consisting of a drummer, bass player, two guitarists and lead vocalist. Vocal set up is one lead, backing provided from the rhythm guitarist and one additional mic for gang vocals on stage left.

Summary of Equipment that is carried including instruments and Backline

Lock Up Laura will provide drum hardware, cymbals, throne, (2) 100w guitar cabinets and valve heads, bass amp, (1) Mic stand, cables, wires, effects.*

All electrical equipment is PAT tested.

The Venue will need to supply additional mic stands, additional microphones, DI's where appropriate

**if Lock Up Laura are a support act the shared responsibility of providing drum hardware will be expected from other acts and venue. TBC at each show.*

Frontline Description

It is assumed that most venues booking a live band have a functioning PA system, monitors and sound desk: however if the venue does not usually host live performances and is booking Lock Up Laura for an event, a PA will need to be provided from the venue. Lock Up Laura may be able to provide PA gear but this will require payment for the hiring of equipment. EQ, Reverb, delay etc to be discussed at sound check.

Lock Up Laura does not provide a sound engineer or lighting tech: these will need to be provided from the venue.
