Francisco Calderón "Calde" - producer, visual artist, DJ and of course musician and founder of **Music Komite**- ended up becoming one of the most interesting figures of the restless Andalusian music scene. Everything happened quietly and calmly, far from the noise , knowing the true value of independence and it's margins of freedom.

After "Sweet Bombs" (Discontinuu 2013) **Music Komite** brings us "Congo Square" (Discontinuu 2015) with which they pay particular tribute to a square in New Orleans where during times of slavery, the african community would often come together to dance and make music. With time, these gatherings played a fundamental role in the origins and evolution of Jazz.

As it was in the square, the album "Congo Square" is an open space, a collage of suggestions based on minimalist nods, elements of hip hop, post rock reminiscents, cut'n'paste, electronica, folk, dub and the light of the sea. It's an album that moves through these parallel worlds that inhabit everyday life, music that is seen as you see a poem, almost a mood or state of being. An album that portrays a Francisco Calderon, impossible to label, an opener of doors, an ally of intuition and beauty, humility and coherence.

After winning the latest edition of the prestigious competition, "Villa de Bilbao 26 (new tendencies)," Calderón and his Komite of musicians Jaime Fernandez (guitars), Esteban Perles (percussion), and Alex Ahumada (stand up bass), accompanied by a tight and eloquent visual set solidifies them as one of the most interesting live acts in the national panorama. Welcome to Congo Square.
