

DISASTER IN THE UNIVERSE PRESS INFO

Disaster In The Universe is one of Norway's most exciting music exports this year. After working with star-producer Peter Mayes (Empire Of The Sun, The Killers, Sia) on their debut album, and playing support for Crystal Fighters, the band is now entering the European music scene.

Disaster In The Universe is a six piece live band, based on a songwriting and production duo. The band has been frequently listed and played on the biggest radio stations in Norway during the last two years, and they have featured on all the biggest music festivals in Norway, including Øya, Hove, Slottsfjell and By:Larm. They received "10/10!" for their by:Larm concert, and Ross Allen (Island Records UK) and Flora Wong (Dazed Digital) rated Disaster In The Universe as the best concert they saw at the entire Øya Festival.

Disaster In The Universe's single «Beach House», a catchy, feelgood indie-funk tune, has been a massive summer-hit in Norway, being A-listed for months and streamed more than a million times on Spotify. «Beach House» has just been released in Germany, Switzerland and Austria, and is already being played at more than 30 radio stations in these countries! Summer 2015 the bands debut album «Coconut Message» will be released in Germany, Switzerland, Austria and Japan.

In Spain Disaster In The Universe has a booking agreement with Menos Que Cero, and this summer they are playing at the festivals Buenas Noches Madrid and Bona Nit Barcelona in front of more than 15.000 people. "Beach House" has been chosen to be the official festival-song for both of the festivals. The band is now negotiating with spanish record companies and the first releases in this territory is expected to take place this autumn.
