

## Stageplan / Techrider

### **Guitar+Bass:**

The guitars should be miked with SM57 (o.t.l.), Bass via D.I. out directly from the amp.

We bring of course our own amps and all the cables for guitars/amps/pedals.

Depending on the size of the stage we use wireless systems.

### **Monitoring:**

There should be at least three monitors on the stage, better if every band member gets his own monitor speaker (as shown above).

### **Miscellaneous:**
