

Karl K. Koch

### **Technical rider**

The setup is simple: for small venues (up to 30-40 people) there`s sometimes even no amplification needed

In case the venue is bigger, I`ll need:

- a 1/4 jack cable (in order to connect the guitar to the local amplification)
- a microphone to tell my stories

**Catering:** I personally like trying local food (I have no special demands), It would just be great to eat a nutrient supper (before or after the concert) and a good breakfast the morning after the gig to jumpstart the day.
