## THE CONTINUUM

### Nothing can stop The Continuum as they look to make their mark on the UK music scene

European unification might be a political debate that continues to divide the nation but one Euro amalgamation that is getting the majority vote is the London-based rock band **The Continuum**.

An eclectic mix of musicians from France, Italy and the UK, **The Continuum** are an example of European harmony, taking their individual musical experiences to group together in perfect synergy, making the whole even greater than their individual parts.

Having previously worked with global artists such as Sting, Peter Gabriel, Etienne Daho, Angelique Kidjo and Lenny Kravitz, **The Continuum** developed a unique sound and style, blending vintage 70s Pop-Rock, symphonic strings and avant-garde electro fusion to create their own identity.

Lead vocalist and guitarist Benjamin Delaunay explains. *"After playing a long time for other artists, we all wanted to create a universe on our own, with an uncompromising approach, and put it into our own music."* He continues, *I believe that music is a shared experience, so we wanted to come back to the roots of music and share it with people."*

With a significant fan-base in Italy and France and an EP, entitled *Borderline*, created at Studio Kashmir in Paris – attracting Awards-winning author Boris Bergman into lyrical collaboration – **The Continuum's** European odyssey continues, as they look set to leave their mark on a UK music scene ready to support this particular European union.

For more information regarding the band's availability, scheduling, interviews and images, please contact **Kevin Reynolds** of **KRMB Management** on:

### Notes to Editors:

In 2013, lead vocalist and guitarist Benjamin Delaunay, guitarist Julien Regnier, keyboard player Alain Bonnin and drummer Marco Parenti had a vision and decided to bring together their array of talents and experiences to form **The Continuum**.

Having produced their first EP in Paris, and with members of the band from Italy, France and the UK, **The Continuum** elected to base themselves in London.

Having developed their sound to enhance their own identity, **The Continuum** are now ready to share their music - which organically fuses old with the new by combining the heat of analogue with the bounce of digital - with the rest of the world.
