

Laurent Méteau's METABOLISM

www.laurentmeteau.ch/metabolism

Technical Rider

We usually tour with all the equipment we need. But we're always happy to use the equipment that's already at the venue.

Here is a list of the material we could use if you have it :

1x amp for electric bass

1x tube amp for electric guitar

1x tube amp for rhodes

1x drumset (without cymbals, without snare)

1x microphone for announcement

We use to play acoustically in small venues. If the venue wants to amplify our concert they need their own equipment and sound engineer (we don't have any PA, monitor, mixtable and engineer).

Catering

We're 7 musicians in the band and we all love and enjoy food. There's no allergies, no vegetarian and no vegan among us. We're always happy to discover local food and local drinks.
