New music with vintage synthesizers

To Jupiter and back

Kebu is a Finnish synth wizard, who creates new instrumental synthesizer music. The music is influenced both of synth music from the 70's and 80's and modern electro.

He has attracted over two million views and a lot of appraisal for his YouTube channel, which contains high quality videos of his music, performed either live or in the studio:

His debut album, "To Jupiter and Back", was released in 2012 by Secret Entertainment and is a tribute to the glamorous synth music by the likes of Jean Michel Jarre, Vangelis, and Mike Oldfield. The album debuted as number 28 on the Finnish Album Chart. Kebu's latest single "Deep Blue" fuses modern club music with vintage synth sounds.

Kebu's music is distinguished not only by a dedicated treatment of analog synthesis but also of an audience-captivating live performance. Kebu uses a huge arsenal of analog synths, which are responsible for all the live audio - no samples or backing tracks are used. Last year, Kebu performed at the largest in-door arena in Finland, Hartwall Arena, and the year before that he performed as warm-up act to Jean Michel Jarre's long-term keyboard player Dominique Perrier and his revived cult band Space Art.

## Awards

German Schallwelle Music Awards, 7th place in the category for "Best international artist"  
German Schallwelle Music Awards, 9th place in the category for "Best international album"
