

CRYSTAL EYES

- Two (2) guitar amps
- One (1) bass amp
- One (1) lead vocal mic run through boss vocal processor (supplied by the band) which requires a DI
- Two (2) back-up vocal mics
- One (1) sampler that requires a DI

This represents our set up in ideal circumstances, however we can be

flexible regarding number of monitors, etc. Three vocal mics is ideal, but we can make two work if necessary. We like the vocals nice and high in the mix and the bass to stand out as well. The DI sampler should be kept relatively low in the mix.
