
Danxia Technical Rider

First of all, thank you for booking Danxia! The following technical rider is designed to help with set up, sound checking and our main performance. Please do not hesitate to contact us at *danxiauk@gmail.com* if you have any further questions.

I. *On stage:*

- 1 Drum kit + Electric Drum Pad
 - 1 Bass Guitar + Amplifier
 - 2 Electric Guitars + Amplifiers
- 1 Vocal Microphone Through a Vocal Processor
- 3 Guitar Pedalboards (Requires 6 Power Sockets)

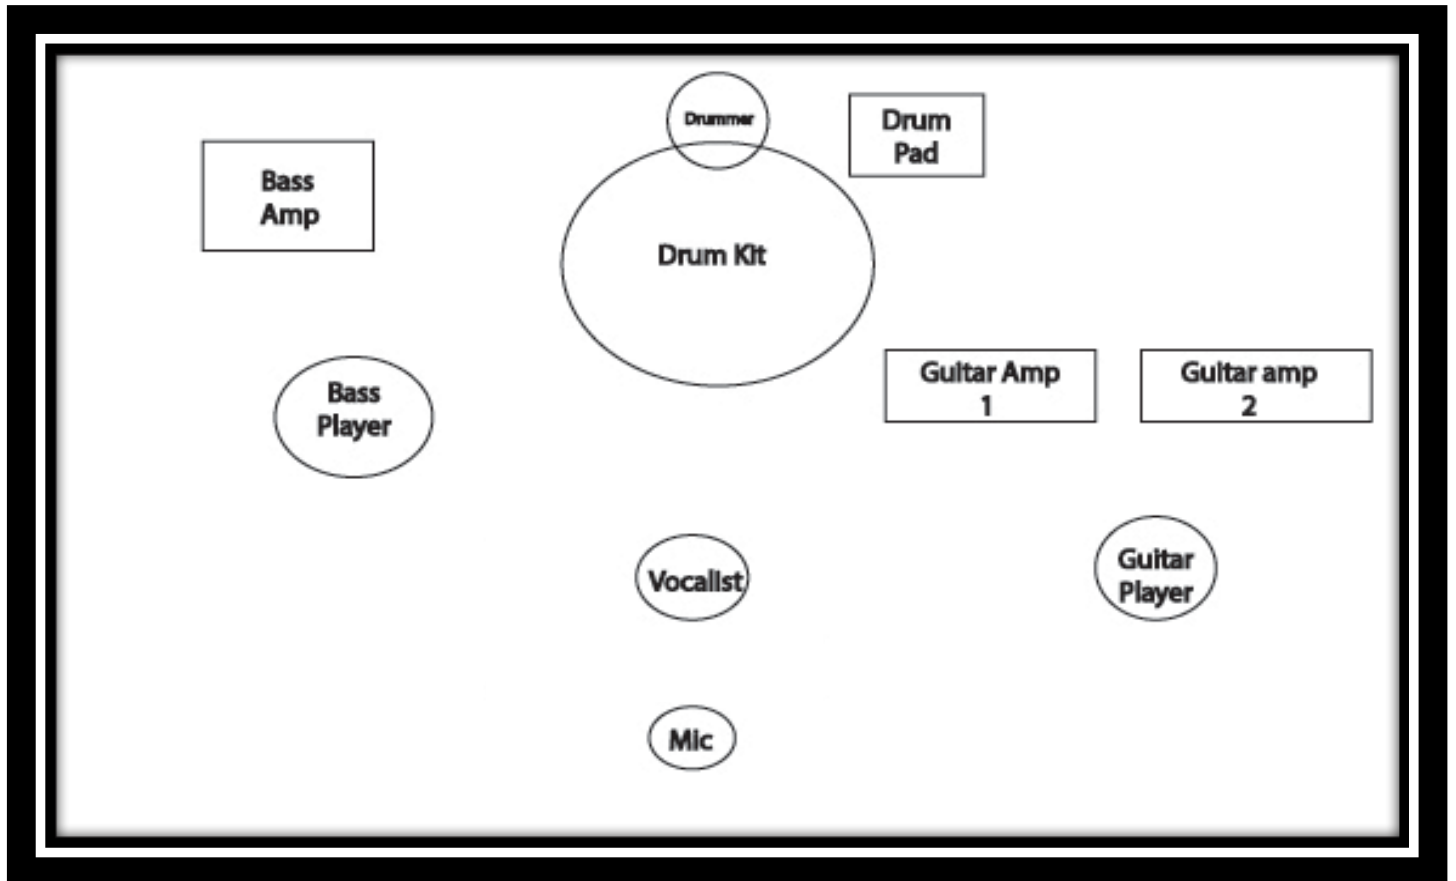

We also need:

- A PA system with onstage monitors and microphones for the equipment and the vocalist (preferably SM58, with microphone stand)
- A professional sound engineer, technical crew and a lighting technician. We have no regular engineers so we heavily rely upon on-site staff.

*Our drummer is not opposed to sharing his drum kit with other bands if it is necessary.

*The opportunity to sound check is required.

II. Stage set up:

Thank you again and we look forward to working with you.
