What should I tell you about this new Paranoya album, my brothers and sisters ? Perhaps that is your senses in a pleasant way in disorder until only fragments remain piecemeal , left? Or of the realists , who fools unmasked while others follow embittered their function to the soundtrack of Disney ? Here comes a fresh wave, something unpredictable , not the same old stuff with the same old reps. 11 times punk rock wich is slowly sneak but no longer disappear from your ear canals.
