

The Night Gardener
Tech Rider

mail@thenightgardener.net
+49 177 354 74 78 (Oliver)

The Night Gardener sings and plays acoustic guitar with several effects. Also he does loops. That's why the mix happens before all is sent to the PA as a sum signal via XLR or line, whichever works best for your venue.

He will bring:

- Taylor Mini GS Acoustic Guitar
- Sennheiser e935 Vocal Microphone
- Pedal Board (overdrive, distortion, delays, looper, mixer, DI)
- Input jacks for all, xlr and line to connect to your PA

The Night Gardener needs:

- 1 mic stand
- 1 monitor (more is good!)
- Your ears and your attention for the soundcheck. We will check guitar and vocal levels, EQ, overall volume and all effects on the pedal board.

Piano option: The Night Gardener also plays the piano. If there is one at your venue, that's great! The piano, if amplified, can be jacked (line) into the pedal board's mixer, so it can be used for looping, which is always a treat! For vocals on piano songs, we'll simply use the Sennheiser, unless you have another mic stand + mic at hand and a free channel.

Thank you!
