

Radioaktif were founded in Bandung, West Java, Indonesia. The most creative city in Indonesia. There were a lot of numbers of good bands were born from this city. Strong and rich genres are still coming up from Bandung. Also, because of the nice weather of Bandung supports artists to be more creative. Radioaktif were founded by Tomy BudiS, Azhari Mukti, and Rully Pulul in 2014. Having sounds like in 90's era, alternative, rock, and grunge, Radioaktif have been working for a couple of months in the studio, wrote songs to be recorded in the middle of 2014. On purpose to release Radioaktif's first EP album, under a local indie label supports; Reach and Rich Records. Unfortunately, while in the process of preparing the EP, Rully Pulul had to leave to Netherlands to continue his study. Between that time periods, Radioaktif had to find a new guy to replace Rully's position. Afterwards, Tomy changed his mind because he did not feel satisfy with the records. Then, a transition happened in the band and changed the plan instead of releasing the EP, Radioaktif decided to record some more new songs and make it to be an LP album.

In the late of 2014, Radioaktif with a new form; Tomy BudiS (vocals, guitars), Azhari Mukti (drums), Reza Prihade (guitars), Ryan Arman (guitars), joined worldwide event of Guinness beer; Guinness Amplify. Radioaktif had been chosen from more than two hundred bands, Radioaktif went to final round which were only four bands were selected. This event also collaborated with a biggest record label in Indonesia; Musica Studio, Rolling Stone Magazine Indonesia, Believe Digital (digital music store

company based in UK), and five times Grammy Awards Winner; Steve Lillywhite. Radioaktif had been mentored about music industry in Indonesia & worldwide. Afterwards, Radioaktif worked on the records and finished in the middle of 2015.

With 12 songs in the LP, currently Radioaktif is working on their work plans and doing their strategy to release the upcoming album. The record sounds very tight with a style of 90's music era. The album recorded at Red Studio with very long shifts and good preparations with good engineers who have good competency in recording studio. The album has a different sound with other bands you know. With three different guitars styles in the band produced a very wide and rock sound. Taking warmth world current issues on the lyrics, and self-experiences, Radioaktif are heard very strong with their style of lyrics.
