

# I Was Bastard

I was a bastard are a trip hypnotic rock band. Inspired by psychedelic sound of rock'n'roll through electronic and experimental music.

"The group sounds like a lot of different genres, and a lot like the golden age of the 90'. An admiration to long and sustained guitars, whaling echoing vocals and confused lyrics who seek comfort"

(Alma Elliot Hoffman, Achbar Hair, 7.12.14)

The bastard's project has been around since 2011 when the person behind it –Nave Shifroni- independently recorded and published the first album "Free".

During the making of the album the band was founded and after a few changes and developments got to its current sound and members.

The group released their first EP "In your great heart" in October 2014 at the InDnegev festival (the biggest alternative music festival in Israel).

The band's live act is a deep, powerful and emotional experience and known well in the alternative scene in Israel.

The band is on their way to a first studio album due to come out on May 2016.
