

RIEMANN ZETA

TECHNICAL RIDER

Riemann Zeta is a 3-piece acoustic band with a fairly simple stage setup:

- 1 Acoustic guitar + vocal
- 1 Vocal + percussion (shakers, guiro, tambourine) + acoustic guitar
- 1 Vocal + trumpet + percussion (shakers, guiro, tambourine)

Acoustic guitars are amplified and can go directly into PA.

For vocals, we prefer Shure Beta 58 or SM 58 microphones (3 microphones total).

For shakers/percussion/trumpet, we prefer condenser microphones, but can work with whatever is available at the venue. (2 microphones total).

Due to our emphasis on rich vocal melodies, the stage should be equipped with (depending on stage size) 2 to 3 monitors with an even mix of all three vocals. Currently, we have no own sound engineer, so we rely on the venue having one. We can assist the venue staff in getting the right mix.

STAGE PLAN

Our typical stage setup is shown in the picture. If available, **we welcome having 3 barstools on the stage** for the quieter songs (WITHOUT arm rests). Stage decorations (carpets, old furniture etc.) and dim lighting for enhancing the ambience are welcome.
