Hi sound and tech. crew,

Thanks for looking after us. We don't have soundcrew on tour with us, so we're truly grateful for all your help in putting together the best live performance we can. If you have any questions about the below, feel free to email us (james@yndihalda.com), or just grab us at your venue so we can discuss in detail. We're always happy to chat about ideas and options.

If you have a chance to check out our music before we arrive, that would likely be best for everyone.

You can hear some here:

<https://soundcloud.com/yndihalda/together-those-leaves>

<https://soundcloud.com/yndihalda/yndi-halda-golden-threads-from-the-sun-excerpt>

You'll notice that the **loud parts need to be really loud**, the **quiet parts are very soft** (i.e. please do not over-compress), and that the **vocals do NOT sit on top** of the music like a pop mix. There are mostly **no "lead"** instruments, just a **fair balance of everything**. We like a **middling** amount of reverb on the vocals with one exception:

- Midway through track #1 the four singers will step back from their mic to sing a choral 4-part harmony line. It will be clear when this is happening. Please **drench this in reverb**.

vocals 4 (Phil, keyboard & guitar stage rear. Backing vocals.)

Monitoring

James: James vocals only.

Daniel: violin very high. Rest even balance beneath.

Phil: house mix.

Oliver: house mix with violin and James / Jack guitars up.

Simon: house mix with James / Jack guitars and James / Simon voices up

Jack: house mix with James guitar up

Lighting

Please NO smoke / dry ice!

Primary colours are cool. If the lighting director has heard or knows our music. that's even better.
