[SOUNDCLOUD.COM/DRIVELONDON](https://soundcloud.com/drivelondon)

DR!VE revolves around the idea of what motivates human beings to create and makes us get up in the morning. It is music that infuses and stimulates drive. Music was always very important to me as a tool of self-expression since starting the Rap group 6ergascho as a teenager. With that group, I got a record contract, several awards and toured across Switzerland since the age of 14. After this experience I wanted to mature musically and incorporate my own voice and more electronic sounds. I also wanted to incorporate the guitar, an instrument I had learned to play from an early age. I recently had a near death experience, which forced me to focus on what drives me. It was not until this existential crisis that I finished the Song “Born Again” (First on Demo). The song symbolises a new beginning for me, which made me concentrate solely on music making and production. The guitars, bass, synthesisers, vocals, arrangements and recordings are all done by myself in my home studio in Dalston, London, if not otherwise stated in the title.
