

# A HISTORY OF SILENCE

DECEMBER 2016 - BRUSSELS

Silence Is The Enemy is a growing Belgian metal band at the crossroad between Melodic Death Metal sharp riffs, Sludge groove and Metalcore melodic aggression.

By combining progressive and aggressive instrumental work and never compromising on impact and efficiency, SITE leads the listener to an oppressive, sinister and intense musical journey.

Soon after releasing their first **maxi single** - GHOST - and first music video in early 2015, SITE was selected to take part in the **LOUD Program**, playing in 2016 on prestigious stages such as the **DURBUY ROCK FESTIVAL** (alongside Mass Hysteria, Do or Die and Powerwolf) and **DOUR FESTIVAL** (with Protest The Hero and Between The Buried & Me).

**Silence Is The Enemy** has now released their first EP - **THE CALL** - a powerful and intricate 5 track package that once again defies the boundaries of Metal genres.

DECEMBER 2016 - BRUSSELS

Beyond the music, SITE conveys their mood through a **refined visual universe**, a key component of the **band's DNA**. In collaboration with fellow Mood Wizard Quentin De Meuter, the band has created a **singular visual identity** that transcends the music and lyrics through **artwork and live performances**.

The **inspirations** of Silence Is The Enemy come from all across the **Metal world**. With all members coming from **different horizons**, the **clash of universes** creates a never-ending flow of inspiration, resulting in their unique **"FUSION GROOVE METALCORE"** : a (not so) delicate blend of aggressive spirit, eerie melodies, eldritch mood and progressive guitar work.

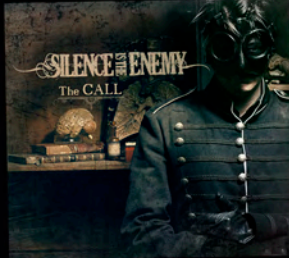

Silence Is The Enemy is now touring to promote **The Call**, while setting up to write the next chapter of their musical journey.

**WILL YOU ANSWER THE CALL?**
