

The Sunny Devils Biography

Mission Statement

The Sunny Devils are an Alternative Rock power trio formed through a will to create riff centric, melodic music that's not scared to get heavy.

Band's Sound

The foundation of the band's sound is a strong clean vocal, big hook riff choruses and minimalist, ambient verses intersected by heavy, technical sections and breakdowns.

Influences

The Sunny Devils take influences from riff and rhythm based bands like *Rage Against The Machine* and *Primus* who use simple, atmospheric and often trippy guitar sounds over a tight, grooving rhythm section that explode into big choruses. Heavy alternative bands like *System Of A Down* inspired *The Sunny Devils* to create music that puts emphasis on melody, as well as madness. Think Royal Blood + Muse + QOTSA.

History

After a year of refining the band's craft behind closed doors, *The Sunny Devils* made their debut in 2016, supporting soon to be massive band and fellow hard alt rockers, *Fizzy Blood*. Later that year, the band supported Canada's *JPNSGRLS*, sharing the stage with *Fizzy Blood* and no strangers to the Scottish Alt Rock scene, *Huxtable*. Before the year was over the debut single 'It's Electric' was released independently after recording at 45 A-Side Recording Studios in Glasgow.

Topping the year off, *The Sunny Devils* earned the chance to perform with internationally established band *De Staat* who were not long off tour as *Muse's* European support, bringing their eccentric brand of electro-rock to Glasgow's *King Tuts Wah Wah Hut*. 2017 was spent writing new music and building relationships with Glasgow's local music scene.

Kicking off was their support for *Anchor Lane's* EP 'New Beginnings', which led to an appearance on the *Soundshape Podcast Live Sessions*. Most recently *The Sunny Devils* supported Glasgow's Hard Alt Rockers *Megalomatic* 'Symbolism' EP launch and Newcastle's XERO on the Edinburgh date of their UK Tour.
