# FREE'MINDS

JamC, Riffree and Chatta along with DJ Cynical decided in early 2017 to combine their like minded lyrical content and passion for hip-hop to create the collective that is Free'Minds. Each bringing their own identities and characters to life through their music, expressing their independent views and insights into the way they view the world.

All three started off independently from one another but as close friends have featured on each others releases and music videos. Due to being part of GK Beats, the hip-hop sub-section of the London based Graffiti Kings, they've been able to reach a global fanbase with over 2 million followers and growing fast. This has allowed them to share their take on the world with a wider audience within the hip-hop community.
