

## Band bio

---

The band was created in Moscow in 2013 with ironic name Pokerface. Band got over some changes of musicians but it has never stopped working intensively in studio and on the stage and finally had crystallized its unique style. Pokerface shared the stage with such famous bands as Megadeth, Kreator, Sodom, Sepultura, Children of Bodom and others. The band is looking up to such metal stars as Slayer, Kreator, Sodom, Testament, Arch Enemy, etc. The music with speed heavy riffs, english lyrics and brutal and clean vocals at the same time – this is the own style of the band.

## Album presentation

---

Game on is not an ordinary album consisted of separated songs, but has its own deep sense and concept. All songs have kind of certain line and different games of chance, casino theme, inner monsters and fears of people who seek for simple ways to solve difficult self-problems inspired their conception.

Everyone knows that the most simple way as usual is not the right one, but being under the social pressure force the hero of this album to make aggressive and cruel decisions. His own behavior puts him into a trap of greed, fear and betrayal. His inner problems appear in images of monsters like Bone Reaper and Fatal Scythe, which hunt him and lead to the deeper layer of his own subconscious. The games that demons make him to play are in general the ways to solve these personal problems. The hero tries this different ways each of which leads to loss of all he earned during his entire life. The labyrinth with no beginning, no end no exit. But the diamonds are formed only under the great pressure and temperature, and the hero of this album is not the exception. In the end of his struggle, he understands, that the maintreasure he owns is himself as a person, and until he remembers who he is, he is winner in all dreadful demons' games and the one who won his own life and right to live as a strong-willed person.
