TECHNICAL RIDER

2/3

Travelparty

4 artists, audio engineer, light engineer, tourmanager and driver.
We are travelling in a splitter van and need a safe place to park our van.

PA

Powerful PA-System, from 20Hz to 20kHz, must suit the capacity of the venue.

FOH

FOH must be centered and in adequate distance to the stage and must be UNDER NO CIRCUMSTANCES under balconies, in a corner or an isolated control room.

Mixing console: min. 32 mono channels, min. 8 aux channels pre/post switchable.

Channel assignment see above. Siderack see inputlist.

We will bring 2 multi effect pedals including one tap delay pedal.

We will NOT bring our own mixing desk, so please contact our audio engineer in advance. Ideally Soundcraft VI1 to VI6, Midas Pro1 to Pro9, Yamaha PM5D or M7CL. No O1V96, LS9 or similar.

Stage

Open air stages must be roofed and 100% rainproof. The promoter or his insurance bares the cost for eventual damages on the artists equipment through rain/weather.

Minimum stage size 6x3m.

We need a drum riser if possible.

Monitoring

We need a minimum of 4 monitor paths. We need 4 monitors on 4 different monitor paths. If possible we need an additional Sub for the drum and bass monitor. Please provide enough cable for flexible monitor placement.

Light

We will bring the following lighting equipment:

- 5x LED pillars (ca 0,35m x0,35m Base 2m high)

- 2x LED-Strobes and eight -8x Par36

- 1x grandMA2 onPC Command + Fader Wing

For our light show we need:

- power outlet with a seperate electric circuit (230V 16A Upstage Right).

- Cat5- cable from FOH to the stage (Upstage Right , we bring a 75m Cat5-Cable)

- 110cm x 90cm space at the FOH

Our light engineer needs the venue specs including an equipment-/patchplan of the venue one week in advance to the show.

Merch Table

approx. 2x1m table near the exit with adequate lighting.
