## **Technical Rider and Catering Rider**

### **Technical Requirements:**

A house PA system and basic lighting should be available at the venue but on prior arrangement, Alan can in some instances travel with his own 2000 watt PA system.

#### **Requirements on stage:**

2x Power Outlets for the onstage equipment, one front of stage, one back of stage

2x Audio Outputs (Stereo) to FOH and Monitor Mixers

Alan Steward is working with Live Looping so all of his sound output is coming out in stereo from his Boss Loop Station, the includes the vocals and instruments.

Alan is a solo artist but has a good amount of equipment and instruments on stage so an open stage area of at least 4x3m is appreciated.

### **Catering:**

Alan has no special catering requirements but if catering is available, some sandwiches, 2 bottles of water and 2 cans of Pepsi or Coke are always appreciated.
