

Tim Royko Technical Rider:

- at least 2 Pioneer CDJ 2000 or 850 (USB-support is essential)
in general preferred are 3 - 4 CDJ's. (linked)
- 1 Pioneer DJM 800, 850 or 900.
- 1 wireless microphone
- 2 monitor speakers ((left and right)) of premium sound quality and reliability,
depending on the size layout of the venue. Plus adequate amplification, cause ear-
protection is used.
- The monitors should be connected to the booth circuit of the dj mixer and not
connected in line with the master output of the mixer.
Monitor volume must be controlled independently by the DJ mixer.
