"An annoyingly massive talent."  
– CLASH MAGAZINE (SI HAWKINS)

With the release of **DISTRACTED**, his second full-length album, **Bowrain** has reached a new period in his artistic vision. **DISTRACTED** features guest appearances by musicians with whom Bowrain developed a collaborative relationship through his live performing and studio work, and who shares his creative vision.

Following his debut album, **DISTRACTED** is above all Bowrain's composing at its best, formed of 7 tracks which arc through the album. It sees the musician embracing his primary instrument, the piano, which is the cohesive and most important element of his sound.

Bowrain's vision embraces his own experience, not as a given fact but as a search for ephemeral structures of music which collide with contemporary and universal insecurities.

*"Piano is my tool, my instrument. There is a reciprocal familiarity that happens when I dive into it. Playing piano for me is more natural than speaking."* - **Bowrain**
