

Stroon's tech-rider/stage plan

1, keyboard + laptop stand

AKAI Mpk249 midi keyboard (can be provided by promoter)

2, 5 x 230V sockets

3, 2 x 1/4 jack soundcard outputs (preferably through dibox)

4, 2 x mic stand with 2 shure beta57A microphones out to the main desk and return from the main desk as 1 XLR cable into "3" soundcard input. Create a "signal loop" for further sampling and looping in the laptop.

This is optional, if not possible, then one shure Beta 57A with an XLR cable on a mic stand

5. switchable mic for communication with audience

Vibraphone, if provided by the promoter, Yamaha YV2700G, or similar type.
