

JANKA - Krzyżacy EP [UKM 063]

JANKA is a project made from a musical friendship between the two of the most original characters of the Polish electronic scene - **Daniel Drumz** and **Hatti Vatti**. The distance between them is 500 km (Cracow – Gdansk), but the love of analogue equipment, sampling and classic club aesthetics plus the fascination with the 90's - that's what connects these two.

JANKA is not just the studio recordings, as from the very beginning the idea for the project was to play live. Mostly analogue equipment - synthesizers, samplers and drum machines are the gear used in their club **live acts**. Each JANKA's performance is different - there is always a lot of improvisation. One thing is certain - you won't stand still at their show!

It is hard to categorize their sound, but early 90s rave/jungle and dubby UK bass music are the genres that definitely come to mind!

"**Krzyżacy**" **EP** will be released on vinyl and digital via U Know Me Records on 16th of February! 5 premiere tracks is a foretaste of what **JANKA** is preparing for this year's festivals!

Cover art was designed by **SEIKON** (<http://www.seikon.pl/>).
Mastering was made by **EPROM**.

JANKA - Krzyżacy EP

TRACKLIST:

A1 Złota Skała Dub
