

*"Them Moose Rush might be one of the most promising and artistically rich bands in prog rock since The Mars Volta."* by Everything is Noise

## BIOGRAPHY

Hailing from Croatia, Them Moose Rush are a progressive rock band unlike any other. The trio have always done things for themselves, and in doing so, done it all inimitably. From directing their own music videos to producing their own photographs, the band even has a penchant for hiding cyphers in songs via Morse codes on keyboards messages or making symmetrical song parts which sound the same if played backwards. And away from the devil in the detail, they simply rock harder and faster than anyone else.

From lead singer Nikola Runjavec's devastating vocal range, spanning a sonic spectrum that takes in Robert Plant, Cedric Bixler-Zavala & Jack White, to bass player Branimir Kuruc and drummer Vedran Marinko Komlen's tight ship of a rhythm section, TMR is a progressive, space-fuelled majesty of electric alt-rock and Machina melody.

Combining vintage vibes which play dutifully with the blues and heavy rock, their approach to song writing and production bursts with innovation. Their second full-length album *Don't Pick Your Noise* (2018) pushes riff after riff in an attempt to challenge listeners' perceptions of what a rock and roll trio is truly capable of. Following their debut the band released two EPs that quickly helped establish them as live fixtures on the European festival and tour circuit, performing at Eurosonic Showcase (Holland), Europavox (France), INmusic (Croatia), Krach Am Bach festival (Germany), sharing the stage with big bands like QOTSA, The Black Keys, Pixies, Colour Haze, The Vintage Caravan and Mars Red Sky.

The band has recently received many significant worldwide praise from influential magazines like Prog, Metal Hammer, Metal Injection, Everything is Noise etc. After this "Don't Pick Your Noise" vinyls and CD's have so far reached supporters from: US, Germany, UK, Switzerland, Australia, France, Italy, Russia, Ireland, Cyprus, Austria, Columbia, Slovenia and of course Croatia.

The band is currently working on a EU tour, summer festival markets in 2019 as well as numerous weekend shows in the region and neighboring countries. The next album is planned for the late 2019.
