

TECH RIDER HOUSE OF LEAVES

4 Vocals

Guitar 1 - Jack

Guitar 2 - Jack or XLR

Banjo - Piezo-Pickup Jack

Mandoline - Piezo-Pickup Jack

Ukulele - Piezo-Pickup Jack

Violin - No Pickup. A separate condenser mic is optimal. Alternatively the vocal mic works fine, it has to be pretty hot to be able to pickup the violin though.

Double Bass - Piezo-Pickup Jack

Cajon - Mic

Tambourin with foot pedal - Mic

We are four musicians, we are constantly switching instruments during the set though. All instruments, except the violin, are equipped with a pickup system. In total we need a minimum of 12 channels. With 13 our violinist has a dedicated Violin-Mic and won't have to use her vocal mic for playing.

We are able to play fully unplugged but having 4 channels for vocals and violin help a lot.

Possible setup:
