

Community Pop Album “TRIANGLES” by MAHADEV OK /Release 23.11.2018 *(Spirit Pop Community/Jomo Om/Believe Digital)*

This is TRIANGLES, a booklet of songs, meetings and trips by singer songwriter Mahadev OK. With this new avatar for who was once called U or Travis Burki are unveiled pop songs fed with broad spaces and music blends. Origin? Travels. In the UK, India and eventually the western USA, precisely Provo, along Salt Lake in Utah where the album was recorded and mixed. Traveller and yogi, Mahadev stops at each step, keeps the feet on the ground and encounters comes to bring body and colour to the tracks originally written and composed in India. More than 30 musicians from the whole world have been involved. Drummers Barak Kram from Israel, Anders Bergstroem from Sweden, Stacie Fleischer (USA), Emiliano Turi (Italia) share the tracks, Sarod (Indian guitar) with Dara Okat Godzuki from Bangalore, and laid back guitars by Vincent O’Brien from Manchester ... The whole material patiently organised by producer Brian Zieske (Interstellar, The Addies...)

Original and classic, smashing and peaceful, where do those tracks come from ? We think of Donovan and George Harrison in “Spiritlessness” or Robert Whyatt in “No Place In The World” with raga flow and orchestral rap, or infinite space of aerial pop from Mercury Rev in “Diamond Man” ..At last we got UFO “The Dentist” love song underlined by bossa rhythms with the swiss-french yogi crooner.

Co financed by his own label (SPC) and a crowdfunding which gathered fans from Europe, USA, India and Australia, Mahadev comes out with a openly 70s album original and classic, from which emanates incredible freedom and serenity.
