

# Catnapp Technical Rider 2018/2019

**Please read this Rider carefully!**

## **Soundcheck**

One hour for Setup and Soundcheck.

## **STAGE / RISERS / TABLES**

A secure and vibration free stage protected with crash barriers and security must be provided. Catnapp needs a table of min. 2,0m x 1m for the artists equipment to be placed at center stage. If there is a DJ-Booth, Catnapp´s table has to be set up in front of it. Please make sure Catnapp has enough space to move around and in front of the table comfortably.

## **FOH SOUND**

The PA system obviously depends on the venue size and layout, however a sufficient and well maintained PA should be supplied to give a good, clear, full-range (20Hz - 18KHz) reproduction to all audience areas. It should be a professional 3 or 4 way active system capable of producing at least 105 dbA at FOH position and consist of no less than 1500W per 100 audience members. It must be able to reproduce sub frequencies loud enough for dance music.

## **MONITOR SOUND**

Please provide a fully functional high quality stereo monitor system! preferred systems:

- I´acoustic: XT115 hiQ tops with SB18 subs and adequate amping
- d&b audio: M4 tops with B4 Subs and adequate amping or similar Setup that is capable of producing at least 105 dbA distortion free on Stage.

## **POWER REQUIREMENTS**

Please provide 6xSchuko Sockets 220/240V Transformers must be provided to enable the running of 220/240 volt powered back-line where local mains voltage is not 220/240 volt. Any transformers must be grounded! Adaptors should also be provided to convert from local mains sockets to EU Schuko (European) style sockets.

## **BACKLINE**

4 x DI-passive 1 x Shure 58 Beta wireless microphone with receiver to be connected to catnapp's soundcard 1 x XLR-Cable 3m 1 x Microphonestand with Clamp for the wireless microphones

## **INPUTLIST Catnapp**

1. laptop L 2. laptop R 3. vocals L 4. vocals R

Inputs 3 & 4 (vocals) must always be +3 db than Inputs 1 & 2 (laptop).
