

## Technical rider DJ Julien B

### Clubs, venues, festivals, corporate- & private parties:

A standard DJ setup with:

- **Soundsystem** (speakers & amplifier(s)): high quality with sufficient power & headroom.
- **DJ mixer**: professional quality from Pioneer, Xone, Denon, Dateq or similar.
- **CD players**: two, with pitch control.
- **Monitor speaker(s)**: one (or two) near the DJ setup, level controllable from the DJ mixer.

Please note: I will bring a laptop with external audio interface. Therefore I'll need two free stereo inputs (line-level) on the DJ mixer. Cables to connect this laptop setup I'll bring myself. A free space of at least 50cm (w) x 50cm (d) is necessary near the DJ setup. The height should be around 90-100cm.

### Small parties (<100 people):

On small parties I can perform with just my laptop setup (with DDJ SX Controller) and do without the CD players, DJ Mixer and in some cases even the monitor speaker.
