NOTES FOR PA/MONITORS

- We use the **drum pad** mainly for synths and drum machines, so it has to be as loud as the guitars on the mix. We all need to hear it in the monitors.
- **Sampler** should be as loud as the guitars too, and we all need it in the monitors. We sometimes use it for fat 808 subs, so please don't cut too much of the lows!

BACKDROP

We travel with a backdrop. Size to be confirmed (sorry!) but it's not too big. Please provide the means to suspend it.

MERCHANDISE

Please provide a well-lit area to sell merch. Any commissions should be notified in advance.

Thanks, hope you enjoy the show! ❤️
