This is the gear we like to work with (and the one that'll make us happy!), but any equivalent one will work.

Mixing Notes

We need to sound punchy, groovy & danceable. The drums & bass should be loud!

Kick vs Kick PAD: Cut softly the low-end of the real kick (under 100Hz) so that the mix of the 2 sounds perfect. *Boosting the middle range of the real kick might help too.*

Bass Compression Sidechain by Kick: Apply a compression to the bass using the kick signal as sidechain signal.

Hi-hats Volume: Hi-hats should sound like House/Dance Music

Backing Voice Volume: It should be hearable! But not loud.

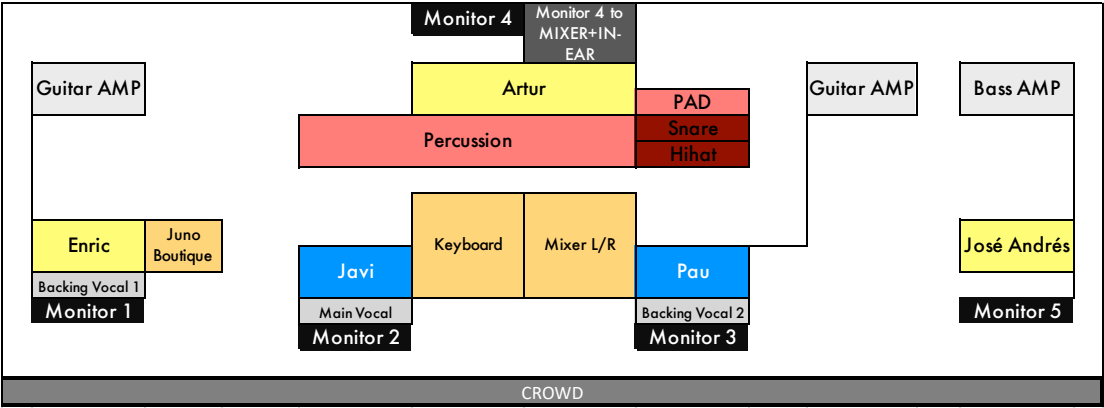

Extras/Backline

Guitar Amp (**x2**): Twin Reverb, AC30 or similar.

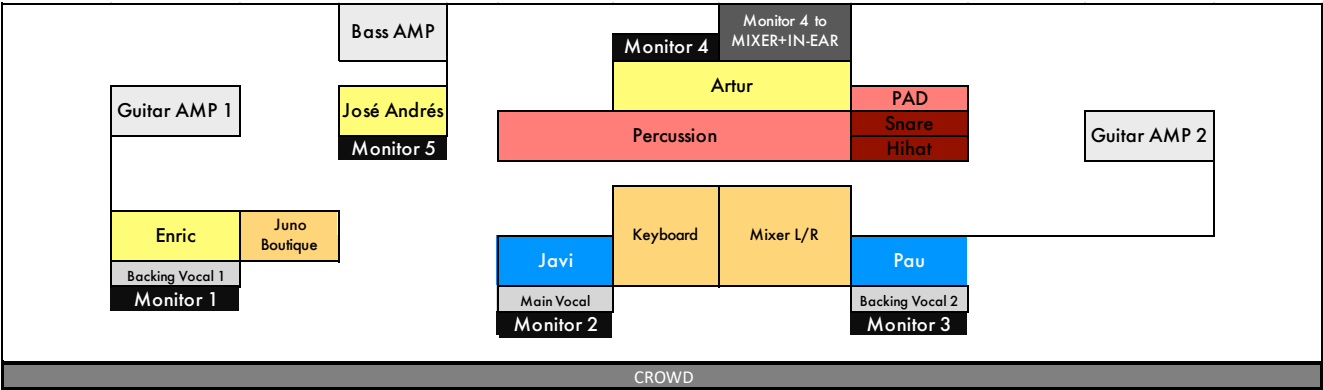

Bass Guitar Amp (**x1**): Markbass Mini CMD 121P or Massive Ampeg Fridge

Keyboard Stands (**x4**): X type
