electronic entertainment since 1998

TECH RIDER REX KRAMER

- updated Feb. 23th 2013

The following guide to the stage set-up for REX KRAMER is an integral part of the contract.

## In general:

- Please locate the set-up in the **middle** of the stage or DJ booth, we prefer a DJ booth to a stage.

## For the set-up, please provide:

- a non-vibrating, **plain** work surface (a minimum height of 100 cm)
- 3 power plugs, directly in front of the set-up (on a power circuit used only for sound, not for light elements to avoid buzz)
- 1 PIONEER DJM 800 Mixer (no other Mixer!)
- 2 PIONEER CDJ 2000 (**absolutely no other CD Players! - updated on newest firmware!!**)
- The two CDJ 2000's must be linked together

The set-up will look like this:

## Monitoring:

An integral part of our shows is the monitoring. Please use a system that fulfills all professional requirements.

- monitoring on the right side ear high. the monitor system should be able to play at least 110 dbA without noise distortion. Make sure the amplifiers provide enough power.

**Please do not use home-made sets! No HK, no JBL, no Omnitronic, no Nexo!**
