

# Jack Perrett

## Technical Rider & Stage Plan

Thank you for your interest in booking a show for Jack Perrett. Below is Jack's Technical Requirements for the show.

### Sound

Jack prefers a simple sound set up with limited effects. Vocals require a small amount of reverb and very short delay. Jack plays through a Vox AC30vr and a pedaltrain pedalboard. Bass player plays through both a bass combo amp with a pedaltrain pedalboard and requires a vocal mic. Drummer requires a vocal mic and monitor. Please be cautious that backing vocal mics for both bass player and drummer are not too overpowering of Jack's lead vocal.

### Lighting

Lighting is not an essential part of Jack's set up but can be used if necessary.

### Soundcheck

A soundcheck would be required on the day of the performance. Liaise with Jack to confirm a soundcheck time.

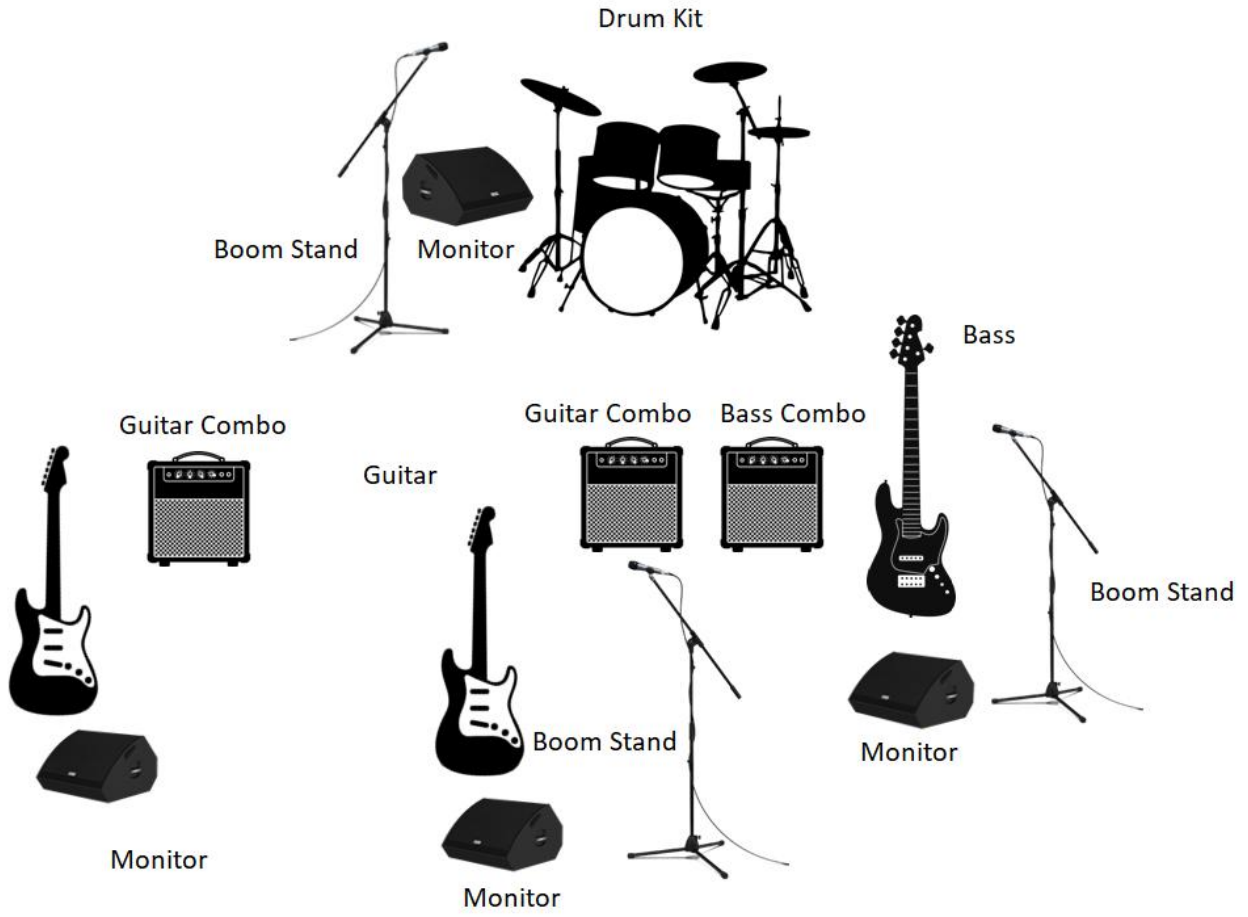

### Merchandise

A table is needed for Jack to sell merchandise after the performance.
