## BIOGRAPHY

---

He started producing music in 2001. Depeche Mode, Kraftwerk, Jean Michel Jarre, Michael Jackson, Koto, Paul Hardcastle, Enigma, Marris, Farley Jackmaster Flash, Jamiroquai were some of the names that have influenced his musical culture.

He started DJing when the vinyl was in, searching for his records in Budapest (Hungary), because at that time in Romania you couldn't find a Dj store. He was starting to use Serato in 2008, which helped him to make the transition much smoother from classical vinyl records to digital records. The key of his success into open format style, is that he always brings good vibes, new songs mixed along with the classics ones, Electronic Dance Music side by side among Hip Hop and Rock'n'Roll music, all mixed with energy and passion.

Nowadays he brings life into an electronic house music project, called "Space Roosters", among his good friends.

His fresh and innovative style keeps the crowd screaming for more and this is why Ruky loves to think that:

"I definitely have the best job in the world! :)"
