

# HARRY HEART

Born in **Walthamstow, East London** and spending his young years writing music in **Sydney, Australia**, Harry Heart received **triple j (AU)** radio rotation and toured Australia before he had finished high school. Heart's moody brand of alternative rock heavily mixes UK influences such as **Bloc Party, Arctic Monkeys** and **Coldplay** with a stadium-bound sound drawn from acts such as **The Killers** and **Kings of Leon**. Now based in **Manchester**, Heart is known to tour with a band as well as solo, offering a maturity and energy beyond his years as a writer and performer.
